

Midwest Fabrication is the industry leader in new technology, productivity and innovation for agricultural grain crop gathering and delivery. We are recognized in the Australian farm equipment market for our design, innovation and manufacturing quality of wide harvesting platforms for grain production systems. Based in Dalby, approximately 200kms west of Brisbane, Midwest is a family owned and operated business with a strong emphasis on family values.

Midwest are seeking reliable and self-motivated boilermakers/skilled welders to join our production team. The appropriate candidates must be reliable, hardworking, be able to read engineered drawings and work with minimal supervision. Forklift license preferable however not required until after a 3 month probation period. You will possess a sharp attention to detail and also have a strong OH&S focus. Experience operating brake press and guillotine would also be beneficial although not essential. Standard 38 hour week with a lunch time finish on Fridays. Some overtime will be required during peak season.

In return, we will provide you with the utensils to perfect your profession, provide a friendly workshop in with a supportive environment and a 4 & a half day work week for most of the year. Relocation grants of \$3000 for the right people. Please direct enquiries to/forward your resume to accounts@midwest.net.au

Unfortunately, we can only accept applications from candidates already living in and having the right to work in Australia.
